

REMARKS

In the Office Action mailed October 3, 2007, the Examiner rejected claims 1-7 under 35 U.S.C. 112, 2<sup>nd</sup> paragraph, for failing to being indefinite; rejected claims 1-6, 8, 10-16, 18 and 19 under 35 U.S.C. 102(b) as being anticipated by U.S. Patent No. 6,560,642 to Nurmman and rejected claims 7, 9, 17, 20 and 21 under 35 U.S.C. 103(a) as being unpatentable over Nurmman in view of U.S. Patent Application Publication No. 2003/0214955.

In response Applicant has cancelled claims 1-7 and amended claim 20 to correct a minor typographical error. No new matter has been added.

By cancelling claims 1-7, the rejection of claims 1-7 under 35 U.S.C. 112, 2<sup>nd</sup> paragraph is now moot.

In rejecting independent claims 8, 15, 20 and 21 the Examiner asserts Nurmman teaches, “determining [if an] assigned Internet Protocol address is a private ... address;” “self-configuring ... based on a format of the Internet Protocol address” and “examining [a] received IP address.” These claims require some form of examination of an IP address. Nurmman does not analyze any address to then decide if it should perform an action. Instead, Nurmman broadcasts a request for an address as a client device and waits to see if it receives ANY address. If an address is provided, the client device remains as a client device. See generally, column 4, lines 38-42. Since Nurmman does not analyze the format of any received IP address, it follows Nurmman cannot anticipate claims 8 and 15.

Claims not specifically mentioned above are allowable due to their dependence on an allowed claim.
